POLITECNICA
DE VALENCIA

To whom it may concern,

I am pleased to recommend Alexis Sánchez Sanz due to his outstanding work in the Master Degree on Telecommunications Engineering at the Polytechnic University of Valencia (Spain). I have taught him RF Circuit Design where he developed several medium to high difficulty analog designs with remarkable results.

He has acquired proficiency in using professional design tools such as AWR (Micro Wave Office) as well as several programming and hardware description languages. Overall he has shown fast learning skills and a methodical approach to complex problems.

Alexis not only has obtained excellent academic results but also has demonstrated great determination and initiative as a team leader.

In summary, Alexis is an extremely talented, dedicated and hardworking student that is likely to succeed in whatever he undertakes. He has valuable problem solving skills and is persistent and critical with results.

Yours sincerely,

Dr. Vicente Herrero Bosch
Associate Professor at Electronic Engineering Department
Senior Researcher at Institute for Molecular Imaging Instrumentation (I3M)
Universidad Politécnica de Valencia
Camino de Vera, s/n. 46022 Valencia. SPAIN
